# inter-office memo

**To:** Bill Wade **Date:** August 23, 1982

**From:** M.Tomczyk **cc:** K.Spencer

**Subject:** MAX BASIC

1. Enclosed for your evaluation/release is the LEARNING BASIC EPROM for the MAX. This version only requires one 64K ROM/EPROM and no RAM on the cartridge. I have used it for one weekend and the commands seem to work okay.

2. Shiraz Shivji is currently working on the BASIC PLUS cartridge which will be "full" BASIC with 4K RAM on the cartridge and SAVE/LOAD capabilities.
